

## Inserting media using Cell Properties

### *An overview*

- To add text, images, video etc to a Clicker cell you must be in 'Edit' mode. There are two 'modes' in Clicker 5, edit and run. Edit is where you can create cells, grids etc - run mode is for the student.
- To add text or an image in Clicker press and hold the Shift key and right click. This will bring up the Cell Properties box.

1. Appearance tab is where you can set up preferences for cell colour etc.
2. Send tab: this is where you can decide to send an image with text.
3. Sound and video tab for sending video etc.
4. Open grid - joining Gridsets together, similar to a hyperlink.
5. Colour and size of font.

- Alternatively you can press and hold the Shift key and left click. This will add text directly into the box.
- In the 'Send' tab you can decide if you want to send an image with the text in Clickers word processor. To 'send' an image to the
